About Us

ZADCO Oilfield Trading LLC is an oilfield equipment, industrial tools and petrochemicals trading and supply company serving the oil, gas and energy sectors. Our activities include sourcing, trading, import, export and distribution of equipment, machinery, spare parts, industrial tools and petrochemical products through local and international supply channels.

Our supply scope covers equipment and tools for drilling, well construction, completion, testing, production, intervention and maintenance. Working from technical specifications, equipment lists and operational needs, we identify suitable supply options, coordinate commercial and delivery arrangements, and provide responsive support throughout the sourcing process.

Mission & Vision

MISSION

- Source and supply certified oilfield equipment, petrochemicals and industrial tools that meet customer specifications and applicable international standards.
- Support the supply process through efficient logistics, technical coordination and responsive service.
- Deliver consistent value with a strong focus on safety, quality and customer satisfaction.

VISION

- To be a trusted and preferred supply partner for oilfield equipment, petrochemicals and industrial tools.
- Support the energy sector with reliable sourcing, quality products and responsive service.
- Build long-term customer relationships through integrity, clear communication and dependable supply.
- Continue strengthening our product range and sourcing capabilities to meet changing customer requirements.

What We Supply

ZADCO sources and supplies oilfield equipment, industrial tools, spare parts and petrochemical products for oil, gas and energy operations. Our supply scope supports drilling, well construction, completion, testing, production, intervention, maintenance and general oilfield operations.

OILFIELD EQUIPMENT

Equipment supporting drilling, well construction, completion, testing, production and well intervention requirements.

INDUSTRIAL TOOLS

Specialised tools and related equipment used across oilfield operations, maintenance and project requirements.

PETROCHEMICALS & CHEMICALS

Production chemicals, drilling fluids, flow-assurance products, lubricants and related industrial fluids.

SPARE PARTS & ACCESSORIES

Replacement components, fittings, accessories and related materials sourced according to equipment specifications and operational requirements.

Drilling, Well Construction & Completion

01

Drilling Equipment & Tools

We source land and offshore drilling and workover rigs, drill bits, drilling tools, drilling fluids and mud-related products. Supply options are reviewed against the application, technical specifications and operating requirements of each enquiry.

02

Well Construction & Cementing

Our supply scope includes casing and tubing, cementing equipment, wellhead installation equipment and tools, liner hangers and related completion equipment. Products are sourced according to well construction specifications, compatibility and project requirements.

03

Well Completion & Stimulation

We source packers, completion tools, slickline units and associated tools for well completion requirements. Equipment selection is guided by technical specifications, operating conditions and the requirements of the intended application.

Testing, Production & Intervention

01

Well Testing & Evaluation

We source pressure-testing instruments, production-testing tools and related measurement equipment for well evaluation. Equipment is selected based on operating pressure, application and required specifications.

02

Production Equipment & Chemicals

We source artificial-lift equipment, including ESPs, gas-lift equipment and rod pumps, along with flow-assurance instruments, production chemicals and well-monitoring and metering equipment. Each requirement is reviewed based on operating conditions and technical specifications.

03

Well Intervention & Workover Equipment

ZADCO sources coiled-tubing equipment, slickline units and tools, workover rigs and related equipment for well-servicing and intervention applications. Equipment is selected based on technical specifications, operating conditions and delivery needs.

Data & Real-Time Acquisition Systems

We source data and real-time acquisition systems for mud logging units, cementing equipment and coiled-tubing equipment

General Oilfield Equipment

ZADCO sources general oilfield equipment, replacement components and related accessories for production, processing and maintenance applications.

Our supply scope includes pumps, compressors, separators, wellheads, Christmas trees, valves and flow-control equipment.

Equipment specifications, operating pressure, capacity, materials and connection details can be provided to support suitable product sourcing. For replacement components, manufacturer, model and part numbers may also be included where available.

Petrochemicals & Production Chemicals

ZADCO sources petrochemicals and chemical products for drilling, production, maintenance and industrial applications.

Our supply scope includes production chemicals, drilling fluids and additives, flow-assurance products, lubricants and related industrial fluids.

Each enquiry is reviewed according to the intended application, product grade, quantity, packaging and delivery requirements. Required safety, technical and certification documents can be confirmed during sourcing.

A Supply Partner You Can Rely On

ZADCO supports oilfield and energy-sector requirements through reliable sourcing, suitable product selection, responsive coordination and long-term client focus.

01

Reliable Sourcing

We assess supply options against technical specifications, quantities and delivery requirements, with availability and lead times confirmed during quotation.

02

Quality Focus

Product suitability, applicable standards and required documentation form part of our sourcing review.

03

Responsive Support

We keep enquiries moving through clear communication, timely clarification and practical follow-up throughout the sourcing process.

04

Safety & Compliance

Safety considerations, applicable standards and documentation requirements are reviewed as part of the supply process.

05

Integrity & Customer Focus

We value transparent communication, responsible commercial practices and responsive support tailored to customer requirements.

Our Commitment to You

At ZADCO, reliable supply begins with understanding the requirement. We approach every enquiry by reviewing the technical specifications, application, quantity, documentation and delivery expectations before identifying suitable sourcing options.

Our focus is on clear communication, responsible sourcing and dependable coordination throughout the purchasing process. By working closely with customers and trusted supply partners, we aim to provide practical solutions, transparent commercial information and consistent support from enquiry through delivery.

We believe long-term partnerships are built through reliability, integrity and responsiveness, with every requirement handled with the same attention to quality and customer needs.

Contact us

We are here to support your sourcing requirements for oilfield equipment, tools and petrochemicals.
